Photoshop actions save time and make you more productive. They can be used to speed up repetitive tasks, make quick work of time consuming edits, and give you a little creative inspiration.

Make sure that your actions panel is activated and visible. It typically shows up as a tab on the history panel.

If your actions panel is nowhere to be found, you can activate it under the "Window" menu, and the first item is the "Default Actions" set.

Sets are a way to group actions. To create a new set, go to the panel menu and select "New Set...". Give the new set a name. When you import and export actions, the whole set rather than a single action is exported.

1. Create a New Action

Select the action menu and click on "New Action...". Give it a name.

2. Begin Recording the Action

The action begins recording immediately and can be verified by checking the red recording icon at the bottom of the actions layer panel.

There's no need to hurry through your sequence of events, because the action is not time based. If you're not doing something to the image, it won't be recorded. So take your time and get it right.

3. Do Your Stuff

Now do whatever it is that you wanted to do. Perform all the tasks, clicks, option settings, and image adjustments that you want included in your action.

If you mess something up or if you accidentally skip a step — don't worry. After recording the action you can go back and edit the steps, add steps, and re-record steps.

4. Ideas For Actions

- Resizing and saving for specific destinations (print or web)
- Basic adjustment layer setups
- Converting color space and bit depth

On the menu bar choose Window > Actions to display the Actions panel.

Click on the Panel Menu icon to display the options.

Creating Actions

File > Open > Camillia.psd

From the Panel Menu on the Action panel, choose New Set

New Set	
Name: Set 1	ОК
	Cancel

Give it a Name and click OK.

From the Panel Menu on the Action panel, choose New Action

New Action	
Name: 300 dpi PSD	Record
Set: PS-Actions 🗘	Cancel
Function Key: None 🗘 🗌 Shift 📄 Command	
Color: None 🗘	

Name the Action *300 dpi PSD*

Choose Image > Image Size. Remove the check mark from the Resample box. Change the resolution from 72 pixels per inch to 300 and click OK.

From the menu bar, choose File > Save As and choose Photoshop as the file type.

	As a Copy Alpha Channels	Notes	
E	Alpha Chappale		
	Alpha Channels	Spot Colors	
	Layers		
	Use Proof Setup:	Working CMYK	
	Embed Color Profi	le: sRGB EC61966-2.1	

THIS NEXT STEP IS VERY IMPORTANT !!!

At the bottom of the Actions panel, click on the **STOP** icon.

Lighten with Layer Adjustment

From the Panel Menu on the Action panel, choose New Action

Name it Lighten w/Layer Adjustment and click Record

New Action	
Name: Lighten w/Layer Adjustment	Record
Set: PS-Actions	Cancel
Function Key: None 🗘 🗌 Shift 🗌 Comm	and
Color: None	¢

Select the Layers panel. At the bottom of the panel, click on the Adjustment Layer icon and choose Levels.

Link | Effects | Mask | Adjustment | New Group | New Layer | Trash

Change the White point adjustment number to 230.

THIS NEXT STEP IS VERY IMPORTANT !!!

At the bottom of the Actions panel, click on the **STOP** icon.

Batching

Create the Action first. You may also need to do some prep work, such as create source and/or destination folders.

From the menu bar, choose File > Automate > Batch

Batch	
Play Set: PS-Actions	ОК
Action: Lighten w/Layer Adjustment	Cancel
Source: Folder	
Choose) MBPro:Users:DesignerDeb:Desktop:PS-Actions:03_Batch:JPGs:	
Override Action "Open" Commands	
Include All Subfolders	
Suppress File Open Options Dialogs	
Suppress Color Profile Warnings	
Destination: Folder Choose MBPro:Users:DesignerDeb:Desktop:PS-Actions:03_Batch:PSDs: Override Action "Save As" Commands File Naming Example: MyFile.gif	
Document Name + + + + + + + +	
Starting serial#: 1	
Compatibility: 🗌 Windows 🗹 Mac OS 📄 Unix	
Errors: Stop For Errors	
Save As	

Choose the Action you want to run

Choose the Source folder

Choose the Destination folder
